

DIBOND®decor

DESIGN WITH NATURALLY INSPIRED WOOD SURFACES.

Product

DIBOND®decor is an Aluminium Composite Material, available in a range of attractive wood-effect finishes.

Resistance

Compared to real wood, DIBOND®decor is unaffected by variations in humidity and temperature and can therefore be used with confidence, like other DIBOND® sheets.

Processing versatility

Popular fabrication techniques such as routing & folding (V-groove), bending and sawing can all be used, providing further advantages over real wood.

High-quality printing results

The surface of DIBOND®decor is an excellent substrate for screen printing or direct-to-substrate digital printing, so it's ideal for promotional messages or information signs.

Low weight

The lightness of DIBOND®decor compared to real wood, allows easy handling, transportation and fixing – with reduced costs.

Application

DIBOND®decor can be specified for a variety of uses in shopfitting, interior cladding, shop fronts, advertising, event marketing, furniture.

Standard range:

Thickness: 3mm

DIBOND®mirror

REFLECTING CREATIVITY. BRINGING YOUR IDEAS TO LIFE.

Totally shatterproof

DIBOND®mirror can be specified with confidence for use in public buildings, where safety comes first - public toilets, hospitals, shopping centres, exhibitions, stage design.

Highly reflective surface

Decorative mirrored walls to enhance light levels and create the illusion of extra space inside.

Extremely low weight

DIBOND®mirror weighs only half of glass mirror with equivalent thickness. This provides exceptional advantages in handling and transportation as well as in mounting large mirror panels.

Distortion-resistant

DIBOND®mirror is extremely flat, rigid and resistant to distortion at fixing points, providing distortion-free reflected images.

Suitable for hygienic applications

Ideal for food-grade applications in the catering trade, hotels, bars and shop counters.

High-quality results with direct-to-substrate printing

Excellent for screen printing or digital printing, so it's ideal for promotional messages or information signs.

Processing versatility

Sawed, drilled, punched, printed, film laminated CNC machines and even water jet – discover the possibilities!
