

Wind load and permissible panel sizes

The graphs for 3 and 4 mm thick ALUCOBOND® plus indicate the maximum permissible panel length without having to add a stiffener based on applicable design wind load and panel width.

- Permissible design stress $\sigma = 51 \text{ N/mm}^2$ safety factor 1.75 is taken into account.
- Values apply to 4-side supported panels.
- Values for other systems on request.
